Data Science Engineer | Artificial Intelligence & AI Development

Engineering student in his 2nd year at INPT (Data Science specialization), passionate about Generative AI and developing high-impact end-to-end practical solutions. Solid experience in RAG, LLM, and production-oriented architectures, acquired through two internships and several full-stack technical projects.

EDUCATION

Engineering Degree – Data Science Specialization

2024 – 2027

National Institute of Posts and Telecommunications (INPT) · Rabat, Morocco

Classes Préparatoires (MPSI / MP)

2022 – 2024

Centre Moulay Youssef · Ranking: 212 / 2700

High School Diploma in Mathematical Sciences A

2022

Lycée Abidar El Ghifari · Graduated with High Honors (Mention Très Bien)

TECHNICAL SKILLS

IA & LLM Python · LangChain · RAG · HuggingFace · FAISS · Weaviate · PyTorch · Scikit-learn

Data Eng Pandas · NumPy · Airflow · PostgreSQL · Selenium · BeautifulSoup

MLOps FastAPI · Docker · Streamlit · Plotly · Git

PROFESSIONAL EXPERIENCE

Artificial Intelligence Intern – ISO 9001 AI Assistant, CIEMS

June – July 2025

Rabat, Morocco · 2 months

- Development: Intelligent platform supporting ISO 9001 certification (chatbot, automated generation of reports and procedures, document compliance analysis, and quality records verification).

Technologies: Python · FastAPI · React · Clerk · Streamlit · RAG · LangChain · FAISS · Gemini API · Pandoc · PyMuPDF

AI Intern – CIEMS (Production-Ready Architecture)

Dec. 2025 – March 2026

Rabat, Morocco · 4 months

- Modular Refactoring: Transformation of the summer internship prototype into a production-ready architecture, fully containerized via Docker.
- Multi-domain Expansion: Integration of additional regulatory frameworks (ISO 27001, public procurement regulations, etc.).

Technologies: Python · FastAPI · Docker · PostgreSQL · RAG · LangChain · Weaviate

TECHNICAL PROJECTS

Intelligent HR Assistant

INPT & Safran (2026)

- RAG conversational agent (FAISS + HuggingFace) with a containerized FastAPI microservices API.
- Admin KPI dashboard (CSAT, response time) built with Streamlit, Plotly, and PostgreSQL.

Tech: Python · LangChain · RAG · FastAPI · Docker · PostgreSQL

AFCON 2026 Prediction

Data Science

- Automated web scraping of historical match data (Selenium + Pandas) and complete tournament simulation using Poisson distribution.

Tech: Python · Selenium · Pandas · Scipy · Matplotlib

Split Learning + Blockchain (2026)

Distributed AI

- Distributed PyTorch training without raw data sharing (Split Learning).
- Solidity smart contract anchoring training metrics (loss/accuracy) immutably on the blockchain.

Tech: Python · PyTorch · Web3.py · Solidity · Ganache

Uncertainty Budget Optimization

OCP & INPT

- Developed a hybrid decision-making system coupling Deep Learning (CNN-LSTM) and Linear Optimization (IBM CPLEX) to automate supply chain risk management (historical data 2008–2026).

Tech: Python · Tensorflow · IBM CPLEX · YFinance API

LANGUES

French: Native / Fluent

English: Intermediate (Professional working proficiency)
